pagepack Safety Document Software

Build safety documents in hours, not weeks.

For safety teams who need speed, accuracy, and control.

✗ The Problem

Copy-Paste Hell
Hunting through old documents, copying sections, hoping you grabbed the right version. Each new manual means hours of assembly.

Version Chaos
Regulations change, and you manually update dozens of documents. Never sure if every client has the latest, compliant version.

Can't Scale
Turning down work because creating documents takes too long. Growth means working nights and weekends.

✓ How pagepack Solves It

Reusable Content Blocks
Build a library of approved policies, procedures, and regulatory language. Drag and drop to assemble any document.

Update Once, Everywhere
Change a regulation once and every document that uses it automatically reflects the update. No hunting for outdated files.

One-Click Publishing
Generate professional, print-ready PDFs with auto-generated tables of contents. Ready to send to clients instantly.

98%	2hrs	0
Reduced manual creation time	Vs. 2 weeks per manual	Errors from outdated content

"We went from spending two weeks creating each safety manual to having it done in two hours. pagepack lets us take on more clients without adding staff."

Sheri Mathieu, **Principal Consultant**, HSE Safety Consulting Group
